🏠 Bangkok, Thailand 📞 093-2094456 ✉️ d.saranc@gmail.com

SUMMARY OF QUALIFICATIONS

Senior QA Tester and System Analyst with 8 years of experience in backend, API, integration, and enterprise system testing across telecom, insurance, and e-commerce domains. Experienced in test strategy, business flow analysis, defect investigation, and cross-functional coordination across SIT, UAT, and production releases. Currently expanding automation capabilities with Playwright.

CORE SKILLS

- Backend & API Testing (RESTful APIs, Third-party Integration, Batch Jobs)
- Requirement & Business Flow Analysis
- Test Case Design & Test Strategy
- Defect Root Cause Analysis & Quality Improvement
- System Integration & Data Flow Validation
- Cross-functional Collaboration (Dev, BA, QA, Operations)

TECHNICAL SKILLS

System Design & Analysis: Requirement Analysis, Business Flow Analysis, Gap & Impact Analysis

Backend & Integration: RESTful APIs, Postman, SoapUI, Third-Party Integration, Data Flow & Business Logic Validation, Batch/Scheduled Jobs

Testing & QA: Test Case Design, Functional & Integration Testing, UAT, Regression Testing, Defect Root Cause Analysis

Web & Mobile Testing: Web Application Testing (Cross-browser & Responsive Testing), Mobile Web Testing (iOS/Android), UI/UX and Functional Validation on Web Interfaces, End-to-End User Flow Testing

Database & Data: SQL, PL/SQL, PostgreSQL, Data Validation, Log Analysis, XML, JSON

Tools: JIRA, Confluence, pgAdmin, PL/SQL Developer

Automation: Power Automate, Playwright (Typescript)

EDUCATION

BACHELOR OF ENGINEERING IN SOFTWARE ENGINEERING

University of Phayao (2013 – 2016)

LANGUAGE

English: Reading Intermediate, Writing Intermediate, Speaking Learning, Listening Beginner

WORK EXPERIENCE

SENIOR SOFTWARE QUALITY ASSURANCE (CONTRACT)

ACCORD INNOVATIONS CO., LTD. | Sep 2025 – Dec 2025

Responsibilities

- Performed end-to-end testing for an e-commerce web platform, validating system functionality across frontend and backend components
 - Analyzed requirements from the Tech Lead and designed detailed test cases covering business logic and user interface behavior
 - Identified requirement conflicts and coordinated with System Analysts and stakeholders to clarify workflows and documentation
 - Executed functional, integration, and UI testing while reporting defects through structured bug tracking processes
 - Communicated directly with Product Owners when requirement inconsistencies affected business decisions
-

SENIOR SOFTWARE TESTER (PERMANENT)

MISUMI (THAILAND) CO., LTD. | Mar 2023 – Jul 2025

Responsibilities

- Led testing activities for an e-commerce platform including web and mobile applications (iOS and Android)
 - Validated frontend behavior against API responses to reduce functional mismatches between UI and backend services before release.
 - Performed mobile testing using Android APK builds and iOS TestFlight releases across physical devices
 - Investigated application logs through Android Studio and Xcode to analyze API responses and integration behavior
 - Planned testing cycles, distributed tasks across vendors and junior testers, and collaborated with developers on complex test scenarios
 - Utilized Power Automate to manage and track test case workflows for large-scale releases and short-term projects
-

SYSTEM ANALYST (CONTRACT) / SENIOR SYSTEM ANALYST (PERMANENT)

EPIC CONSULTING CO., LTD. / MIMO TECH COMPANY LIMITED | Jun 2021 – Nov 2022

Projects : AIS FBB-Fibre Workflow & Web Register Platform

Responsibilities

- Analyzed business requirements, system workflows, and technical specifications to support telecom onboarding and service subscription platforms
 - Prepared functional specifications and system documentation for developers and QA teams
 - Designed and validated workflows supporting customer onboarding, document verification, order creation, and installation scheduling
 - Coordinated system enhancements and feature implementations while ensuring compatibility with existing business processes
 - Led initiatives to expand service channels, including Pocket WiFi subscriptions and integrated payment methods such as QR code and credit card transactions
 - Supported database logic validation and business rule implementation across Oracle and PostgreSQL environments
 - Participated in system migration from on-premise infrastructure to cloud platforms, validating converted database logic and ensuring business logic consistency
 - Coordinated with developers, testers, and third-party vendors to align system integrations and project deliverables
 - Provided production support and troubleshooting for system issues across each release cycle
-

SOFTWARE TESTER (CONTRACT)

APAR TECHNOLOGIES (THAILAND) LTD. | Sep 2018 – Mar 2021

Projects : Bangkoklife (BLA) Insurance & AIS Web Register Platform

Responsibilities

- Performed backend data validation using SQL queries
 - Executed functional, integration, and regression testing
 - Translated business requirements into test scenarios and validation criteria.
 - Executed regression Test cases in Dev , SIT and UAT environment, logged defects till closure during testing.
-

ASSOCIATE SOFTWARE TEST ENGINEERING (PERMANENT)

AWARE TECHNOLOGY SOLUTIONS. | Aug 2017 – Sep 2018

Projects : AIS SFF & CSP

Responsibilities

- Executed SQL queries to test backend data validation of database tables based on business requirement.
- Documented the test results with test status and defect information.
- Designed test cases, test steps, and test scenarios.
