

Saran Chuephoodee (Dream)

Senior Software Tester | Senior Quality Assurance | Backend & Integration Testing

Bangkok, Thailand

093-2094456

d.saranc@gmail.com

SUMMARY OF QUALIFICATIONS

Senior Software Tester / Quality Assurance professional with 8 years of experience in software testing, requirement analysis, backend validation, API integration, SIT/UAT support, defect investigation, and end-to-end testing across Telecom, E-Commerce, and Insurance domains. Experienced in validating complex business flows across web, mobile, API, database, and backend systems to ensure system behavior aligns with business requirements and expected user journeys.

Strong background in requirement-based testing, test scenario design, functional testing, integration testing, regression testing, mobile application testing, and production support. Able to analyze business requirements, clarify expected behavior, identify requirement gaps, investigate root causes, and coordinate with developers, BAs, SAs, Product Owners, vendors, and stakeholders to support stable and reliable releases.

CORE SKILLS

- Requirement Analysis for Testing
- Test Scenario & Test Case Design
- Functional Testing
- Integration Testing
- End-to-End Testing
- Regression Testing
- SIT / UAT Support
- API Testing & Validation
- Backend Data Validation
- SQL Query & Data Checking
- Mobile Application Testing
- Web Application Testing
- Defect Root Cause Analysis
- Gap & Impact Analysis
- Test Planning & Test Cycle Coordination
- Production Issue Investigation
- Cross-functional Coordination

AI & DIGITAL LITERACY

- Experienced in using Power Automate to manage test case workflows, track release progress, reduce manual tracking effort, and improve visibility during large-scale release cycles.
- Familiar with API testing tools, database tools, mobile debugging tools, logs, JSON, and XML for requirement-based validation and defect investigation.
- Currently expanding automation testing skills with Playwright for web-based E2E testing and test execution improvement.
- Able to use AI-assisted tools to support documentation, test scenario preparation, requirement clarification, and productivity improvement.

TECHNICAL SKILLS

API & Backend Validation: RESTful APIs, Postman, SoapUI, API Response Validation, Third-party Integration Testing, Batch / Scheduled Job Validation, Business Logic Validation

Testing & QA: Functional Testing, Integration Testing, End-to-End Testing, Regression Testing, SIT/UAT, Test Case Design, Test Scenario Design, Defect Management, Root Cause Analysis, Production Support

Web & Mobile Testing: Web Application Testing, Mobile Application Testing, Android APK Testing, iOS TestFlight Testing, Android Studio, Xcode

Database & Data Validation: SQL, PL/SQL, PostgreSQL, Oracle, Data Validation, Log Analysis, XML, JSON

Tools: JIRA, Confluence, pgAdmin, PL/SQL Developer, Postman, SoapUI

Automation / Productivity: Power Automate, Basic Playwright, AI-assisted Documentation

WORK EXPERIENCE

SENIOR SOFTWARE QUALITY ASSURANCE (CONTRACT)

ACCORD INNOVATIONS CO., LTD. | Sep 2025 – Dec 2025

Responsibilities

- Performed end-to-end testing for an e-commerce web platform, validating system functionality across frontend, backend, API, and business flow components.
- Analyzed requirements from the Tech Lead and designed detailed test cases covering business logic, UI behavior, user flow, and integration results.
- Identified requirement conflicts, unclear workflows, and business logic gaps before release, then coordinated with System Analysts, Product Owners, and stakeholders for clarification.
- Executed functional testing, integration testing, UI testing, and backend validation to ensure system behavior aligned with business requirements.
- Logged defects with clear steps, expected results, actual results, evidence, and business impact to support efficient issue resolution.
- Communicated directly with Product Owners when requirement inconsistencies affected business decisions or release scope.
- Supported release readiness by validating critical user journeys, integration behavior, and requirement coverage.

Impact Highlight:

Helped reduce requirement ambiguity and release risk by identifying business logic conflicts early and coordinating clarification with technical and product stakeholders.

SENIOR SOFTWARE TESTER (PERMANENT)

MISUMI (THAILAND) CO., LTD. | Mar 2023 – Jul 2025

Responsibilities

- Led testing activities for an e-commerce platform covering web application and mobile applications on iOS and Android.
- Analyzed requirements, user journeys, and system behavior to create test scenarios, validation criteria, and expected results.
- Validated frontend behavior against API responses to identify mismatches between UI behavior, backend logic, and business requirements.
- Performed mobile application testing using Android APK builds and iOS TestFlight releases across physical devices.
- Investigated application logs through Android Studio and Xcode to analyze API responses, mobile behavior, and integration issues.
- Planned test cycles, prioritized validation scope, distributed tasks across vendors and junior testers, and tracked testing progress.
- Coordinated with developers, vendors, and project teams to clarify requirements, investigate complex scenarios, and support defect resolution.
- Used Power Automate to manage and track test case workflows for large-scale releases and short-term enhancement projects.

Impact Highlight:

Improved testing visibility and release control by coordinating test cycles, tracking validation progress, reviewing API behavior, and supporting defect investigation across web and mobile releases.

SYSTEM ANALYST (CONTRACT) / SENIOR SYSTEM ANALYST (PERMANENT)

EPIC CONSULTING CO., LTD. / MIMO TECH COMPANY LIMITED | Jun 2021 – Nov 2022

Projects: AIS FBB-Fibre Workflow & Web Register Platform

Responsibilities

- Analyzed business requirements, system workflows, and technical specifications for telecom onboarding, customer verification, order creation, installation scheduling, payment, and service subscription platforms.
- Prepared functional specifications, system documentation, workflow descriptions, and validation criteria for development and QA teams.
- Designed and clarified end-to-end business flows covering customer onboarding, document verification, service subscription, payment processing, installation scheduling, and order submission.
- Coordinated with business users, developers, QA teams, vendors, and stakeholders to clarify requirements and confirm expected system behavior.
- Supported SIT/UAT preparation, issue clarification, defect analysis, root cause investigation, and release-cycle troubleshooting.
- Analyzed backend business rules, database logic, and integration behavior across Oracle and PostgreSQL environments to ensure functional consistency.
- Participated in system migration from on-premise infrastructure to cloud platforms, including validation of converted database logic and business rule consistency.
- Supported production issue analysis by identifying root causes, business impacts, and system impacts, then coordinating fixes with related teams.

Impact Highlight:

Strengthened QA capability through direct System Analyst experience, especially in requirement analysis, business flow understanding, functional specification, backend logic, and production issue investigation.

SOFTWARE TESTER (CONTRACT)

APAR TECHNOLOGIES (THAILAND) LTD. | Sep 2018 – Mar 2021

Projects : Bangkoklife (BLA) Insurance & AIS Web Register Platform

Responsibilities

- Executed functional testing, integration testing, regression testing, SIT, and UAT support across insurance and telecom platforms.
- Analyzed business requirements and translated them into test scenarios, validation criteria, and expected system behavior.
- Performed backend data validation using SQL queries to verify business rules, transaction results, and data consistency.
- Validated functional flows, integration behavior, and regression impacts across Dev, SIT, and UAT environments.
- Logged defects with test evidence, issue details, and expected results, then followed up with development teams until closure.
- Supported requirement clarification and impact validation for system changes across business-critical workflows.

Impact Highlight:

Built strong experience in requirement-based testing, SQL data validation, SIT/UAT execution, and defect follow-up across enterprise systems.

ASSOCIATE SOFTWARE TEST ENGINEERING (PERMANENT)

AWARE TECHNOLOGY SOLUTIONS. | Aug 2017 – Sep 2018

Projects : AIS SFF & CSP

Responsibilities

- Reviewed business requirements and system behavior to prepare validation scenarios and expected results.
- Executed SQL queries to validate backend data based on business requirements and system conditions.
- Performed functional testing, regression testing, and requirement-based validation across telecom systems.
- Documented test results, defect details, validation evidence, and test status for project tracking.
- Coordinated with senior team members to clarify requirements, confirm expected behavior, and support issue investigation.

Impact Highlight:

Developed a strong foundation in manual testing, backend data validation, requirement-based test design, and telecom system workflows.

ACHIEVEMENTS & MEASURABLE RESULTS

- Supported testing and release activities across Telecom, E-Commerce, and Insurance domains.
- Performed validation across web, mobile, API, backend, database, SIT, and UAT environments.
- Supported large-scale and short-term release cycles by planning test activities, tracking progress, and coordinating with developers, vendors, and junior testers.
- Identified requirement conflicts, business logic gaps, API mismatches, and integration issues before production release.
- Used SQL, logs, API tools, and mobile debugging tools to support root cause analysis and defect investigation.
- Applied Power Automate to improve test case workflow tracking and release progress visibility.
- Supported system migration validation from Oracle to PostgreSQL and on-premise to cloud through backend logic and business rule checking.

EDUCATION

BACHELOR OF ENGINEERING IN SOFTWARE ENGINEERING

University of Phayao | 2013 – 2016

LANGUAGE

English: Reading Intermediate, Writing Intermediate, Speaking Learning, Listening Beginner

PORTFOLIO / ONLINE PRESENCE

Web Profile: <https://profile-about-me-8dhg.vercel.app/>

Portfolio includes:

Senior QA profile, web/mobile testing experience, API/backend validation background, selected project experience, and automation learning.
